Denis O. Onduso

Aspiring Network, Cloud & Security Engineer

denisonyancha71@gmail.com | github.com/denis541 | LinkedIn: not yet | Kenya

PROFESSIONAL SUMMARY

Second-year Bachelor of Science in Information Technology student with hands-on experience in network engineering, security operations and infrastructure monitoring. Builds and documents practical labs using Cisco Packet Tracer, Wireshark, Sysinternals and Splunk, and is extending that foundation into AWS cloud networking and security. Working towards CCNA and AWS Solutions Architect Associate. Open to learning and collaboration.

EDUCATION

Bachelor of Science in Information Technology graduation year 2028

Africa International University | Currently in second year

CERTIFICATIONS (IN PROGRESS)

Cisco Certified Network Associate (CCNA) Expected December 2026

AWS Certified Solutions Architect – Associate Expected June 2027

PROJECTS

Network Infrastructure Engineering (Cisco Packet Tracer) View on GitHub

- Built hands-on network labs covering switching, routing, ACLs and OSPF, among other topics.
- Documented the lab work in a public GitHub repository.

SOC Analysis and Incident Response (Wireshark, Sysinternals) View on GitHub

- Analysed packet captures (PCAPs) in Wireshark to examine network traffic.
- Parsed logs and investigated system activity using Sysinternals tools.

ICT Infrastructure Monitoring with Splunk (Splunk SIEM) View on GitHub

- Monitored network activity using the Splunk SIEM platform.
- Collected and reviewed log data to observe network and infrastructure activity.

Cloud Projects on AWS (In progress) Repository to be added

- Hands-on cloud work on AWS, in progress alongside Solutions Architect Associate preparation.

TECHNICAL SKILLS

Networking	OSI and TCP/IP models, IP addressing, subnetting, switching, routing (OSPF), DNS, DHCP, ACLs, firewalls, VPN concepts
Cloud	AWS VPC (subnets, route tables, internet gateways, security groups), IAM, hybrid connectivity concepts, load balancing and Route 53 concepts, Infrastructure as Code (Terraform, CloudFormation)
Security	SIEM and log analysis (Splunk), packet analysis (Wireshark), Sysinternals, zero-trust principles, GRC frameworks (ISO 27001, SOC 2, NIST, GDPR)
Tools	Cisco Packet Tracer, Wireshark, Sysinternals, Splunk, AWS, Python, Terraform, Git and GitHub
